

WE PRESENT Trees for bees

By Chloe Simpson, Elian Khehra and Charlotte Booth

What are we?

Trees for bees is a non-profit charity organisation that aims to change the Earth for the better, by planting trees and providing beehives to create a haven for the wildlife in our orchards, meadows and woods situated in Oxford, Cornwall and Staffordshire.

We have been sponsored by Hivery, the world famous beehive manufacturer. This means that we have access to high quality hives to ensure the best quality of life for our bees.
